DR HARSHA'S LIFESTYLE & PREVENTION CENTRE
163, Shree Villa, 11th Main, RBI Layout, , JP Nagar 7th Phase, Bengaluru, Karnataka. Ph.: 9113696867

Diabetes Risk Profiler

PATIENT DETAILS

Name : SUBHADRA
Sex : M Wt(kg) : 58 ID : 01042025
Age : 58 Yrs Ht(cm) : 141
Heart-Ankle : 97.99 cm
Heart-Brachial : 28.81 cm
BMI : 29.17kg/m^2

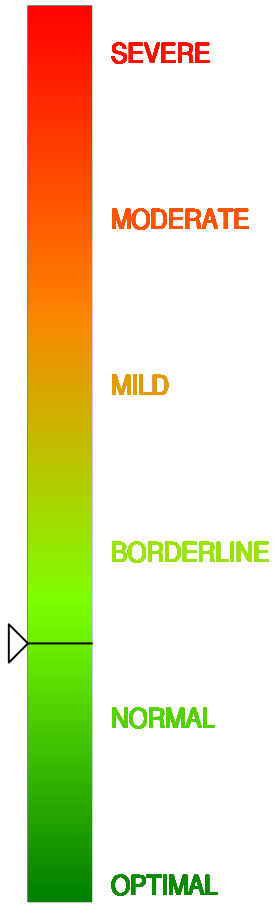
TEST DETAILS

Date : 01 / 01 / 2009 Time : 02 : 38 : 19
Report Date :01 / 01 / 2009 Report Time : 00:02:22

PATIENT HISTORY

§ Risk Factors:
No reported Risk factors
§ Daily Activity:
No Activity : Leisurely at Home.
§ Reason for visit:
Checkup
§ Symptoms:
No reported Symptoms
§ Diseases:
No reported disease
§ Surgery:
SURGERY(None)
§ BMI:
Overweight

RISK GRADE



OBSERVATIONS ON TEST RESULTS

1. Arterial Stiffness:
Rt: Mild CA Stiffness Lt: Normal Left baPWV --- Observed cfPWV indicates High-Normal Aortic Stiffness
2. Peripheral Artery Disease:
Right:ABI Normal:Peripheral ASO may be absent --- Left:ABI Normal:Peripheral ASO may be absent
3. Endothelial Function:
Abnormal Endothelial Function
4. Blood Pressure:
Hi-Normal Blood Pressure
5. Autonomic Nervous System:
Mild ANS Dysfunction.Decreased ANS Activity.
6. Peripheral Nervous System:
Right plantar foot nervous system : Abnormal . Left plantar foot nervous system : Abnormal
7. Pulmonary System:
Normal Spirometry

Comments:

Physician

All results to be clinically correlated.

Diabetes Risk Profiler

CLINICAL INTERPRETATION & THERAPEUTIC SUGGESTIONS*

INTERPRETATION:

Total CardioVascular risk grade :Borderline with Borderline Arterial Stiffness.
Autonomic Nervous System : Mild ANS Dysfunction.Decreased ANS Activity.
Right plantar foot nervous system : Abnormal . Left plantar foot nervous system : Abnormal
Pulmonary System : Normal Spirometry

CLINICAL RECOMMENDATIONS:

Lipid profiling may be advisable.Modify Lifestyle : Weight reduction required.Check for Heart rate.
Take precaution while stressful work/exercise.
Exercise Caution while walking barefoot.

THERAPEUTIC SUGGESTIONS:

Arterial System : Lifestyle modification recommended.: No additional anti-arterial stiffness drugs may be needed. .
Autonomic Nervous System : Lifestyle Modification Required. Thiazide may be considered.
Peripheral Nervous System : alpha-Lipoic acid may be considered with antioxidants. If clinically appropriate, Pregabalin may be considered.
Pulmonary System: None

*All the Interpretations, Recommendations and Suggestions are subject to clinical evaluation by a qualified Physician.

All results to be clinically correlated.

Diabetes Risk Profiler

ARTERIAL HEALTH PROFILE TEST RESULTS

Sr. No.	Parameter	Unit	Normal Value	Observed Value	Significance
1	Heart Rate	BPM	60 to 100	57	HR is low. Bradycardia suspected.
2	Blood Pressure	mmHg	120/80	136 / 75	Hi-Normal Blood Pressure
3	Pulse Pressure	mmHg	Less than 50	61	PP high by 11mmHg :mild Risk
4	Right baPWV	cm/s	Less than 1410.60	1674.78	Mild CA Stiffness
5	Left baPWV	cm/s	Less than 1410.60	1334.79	Normal Left baPWV
6	CFPWV	cm/s	Less than 992.04	1020.61	High-Normal Aortic Stiffness
7	R Bra ASI	mmHg	20 to 70	43.50	Normal rbASI
8	L Bra ASI	mmHg	20 to 70	39.50	Normal lbASI
9	R Ank ASI	mmHg	20 to 70	44.00	Normal raASI
10	L Ank ASI	mmHg	20 to 70	37.25	Normal laASI
11	R ABI	None	0.9 to 1.35	1.02	ABI Normal:Peripheral ASO may be absent
12	L ABI	None	0.9 to 1.35	1.01	ABI Normal:Peripheral ASO may be absent
13	Aortic Sys Pressure	mmHg	Less than 120.05	120.55	Borderline increase in Ao Sys
14	Aortic Pulse Pressure	mmHg	Less than 38.02	42.82	Mild increase in Ao PP
15	Aortic Dia Pressure	mmHg	Greater than 82.53	77.74	Moderate decrease in Ao Dia
16	Aortic Augment. Pressure	mmHg	Less than 9.39	10.85	Borderline increase in Ao Aug P
17	Aortic Augmentation Index	%	19.70	25.34	Mild increase in Ao AIx

All results to be clinically correlated.

AUTONOMIC NERVOUS SYSTEM TEST RESULTS

HEART RATE VARIABILITY TEST RESULTS

Sr. No.	Parameter	Unit	Normal Value	Observed Value	Significance
1	LF Power	%	22 to 46	21.53	Diminished Sympathetic activity
2	HF Power	%	22 to 34	25.50	Normal HF Power
3	LF/HF Ratio	--	0.5 to 2	0.84	Normal Sympathetic-parasympathetic balance
4	pNN50	%	>4%	2.21	Diminished ANS activity
5	Triangular_HRV_Index	None	more than 8	7.30	Diminished ANS activity
6	RMSSD	ms	35 to 65	64.17	Normal HRV
7	SDNN	ms	40 to 80	26.52	Decreased ANS Activity
8	SD1/SD2 Scatter Index	None	0.33 to 0.66	0.41	Normal Sympathovagal balance

ANS STIMULATION RESPONSE TESTS RESULTS

Sr. No.	Parameter	Unit	Normal Value	Observed Value	Significance
1	Valsalva Ratio	None	>1.21	1.23	Normal Valsalva response
2	30:15 Ratio	None	>1.1	0.37	Abnormal response to Postural Change
3	E/I Ratio	None	>=1.21	1.11	Abnormal Response to breathing

LF = Low Frequency, HF = High Frequency, RMSSD=Root Mean Square of the Successive Differences, NN = Normal to Normal beats

SDNN = standard deviation of NN intervals, pNN50 = Percentage of NN50 counts

All results to be clinically correlated.

PERIPHERAL VIBRATORY PERCEPTION TEST RESULTS

Sr. No.	Plantar Location	Normal Value	Test Value	Observation	Sr. No.	Plantar Location	Normal Value	Test Value	Observation
1.	R-Toe	15V	12.17	Normal	7.	L-Toe	15V	11.92	Normal
2.	R-First Metatarsal head	15V	12.84	Normal	8.	L-First Metatarsal head	15V	10.83	Normal
3.	R-Third Metatarsal head	15V	14.79	Normal	9.	L-Third Metatarsal head	15V	12.17	Normal
4.	R-Fifth Metatarsal head	15V	14.80	Normal	10.	L-Fifth Metatarsal head	15V	11.09	Normal
5.	R-Instep	15V	15.67	Abnormal	11.	L-Instep	15V	15.67	Abnormal
6.	R-Heel	15V	12.60	Normal	12.	L-Heel	15V	12.17	Normal

RESPIRATORY SYSTEM TEST RESULTS

Sr. No.	Parameter	Unit	Normal Value.	Observed Value	Significance
1	FVC	l	1.82	3.10	Normal FVC
2	FEV1	l	1.51	2.78	Normal FEV1
3	FEV1/FVC ratio	%	76.77	89.65	Normal FEV1/FVC ratio
4	PEF	l/s	5.05	5.35	Normal PEF
5	PIFR	l/s	None	2.23	--
6	FET100	s	None	1.90	--
7	FEF25%	l/s	4.44	5.35	Normal FEF @ 25%
8	Average flow rate 25-75%	l/s	2.35	3.35	Normal average flow rate

All results to be clinically correlated.
